PROJECTS

- **4-Bit Binary Coded Hexadecimal** May 2025 - July 2025
Academy of Skill Development
 - Designed and implemented a 4-bit binary-coded hexadecimal decoder using Verilog HDL, targeting a Spartan-7 FPGA. The design reads 4-bit binary input via switches and displays the corresponding hexadecimal digit on a 7-segment display. It supports multiple display selection, reset functionality, and enables digital visualization of binary input on hardware.
- **CPU(Central Processing Unit)** August 2025 - September 2025
 - Designed and implemented Central Processing Unit with basic functionality like Addition, Subtraction and AND logic gate.

INTERNSHIPS

- **Academy of Skill Development** May 2025 - July 2025
VLSI BASED IC DESIGN Module - 103, SDF Building, Sector -V, Salt Lake, Kolkata - 700091
 - Tools : Xilinx Vivado, Microwind
 - Implemented 4-bit Binary Coded Hexadecimal to 7-Segment Display Decoder on Spartan-7 FPGA, I converted Binary to Onehot then from Onehot to 7-segment Display
